THE CHANGING LANDSCAPES OF EUROPE

WARSAW · 23-25 OCTOBER 2026

Hosted by the ICCG (Imperial College Club of Germany) and the Imperial College Alumni Group in Poland, our Warsaw weekend explores how Europe is changing — through food, cities, forests and the communities that connect them.

From food security and resilient urban systems to biodiversity and natural heritage, we bring together different perspectives on sustainability and the forces reshaping Europe.

And then we leave the conference room behind: for a walk through Bielański Forest, dinner in the heart of Warsaw and a Sunday exploration of the city itself.
